## DETAILED ACTION

### *Double Patenting*

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-7, 11-15, 17-21, 23-26, 29-32, 36, 37 and 42-45 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 28-34, 36-55, 57, 58 and 63-66 of prior U.S. Patent No. 6,245,357. This is a double patenting rejection.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 10, 27, 28, 33 and 38-41 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 35, 50, 51, 56 and 59-62 of U.S. Patent No. 6,245,357. Although the conflicting claims are not identical, they are not patentably distinct from each other because the release period lies within the release period

Art Unit: 1615

claimed in the issued patent. Compare claims 27 and 28 of application and claims 50 and 51 of US 6,245,357.

5. Claims 8-10, 16, 22, 34 and 35 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 28-34, 37, 38, 43 and 52 of U.S. Patent No. 6,245,357 in view of Jao et al. (US 5,660,861). Jao discloses a method for delivering an antiepileptic drug to a patient in need. Jao's method comprises orally administering a formulation comprising an antiepileptic drug. The formulation comprises a core of antiepileptic drug, an internal coat surrounding the drug, an external semipermeable coat/membrane that contacts the internal coat and a passageway in the dosage form for releasing the drug. Jao discloses that fluid is imbibed through the semipermeable wall at a rate determined by the permeability of the semipermeable wall and the osmotic pressure gradient across the semipermeable wall and this process causes push layer to expand. The inner wall comprises polymeric material selected from the group consisting of cellulose acylate, cellulose acetate, cellulose propionate and hydroxyl alkyl cellulose. The semipermeable polymers comprise cellulose acetate. The dosage amount of the antiepileptic drug is delivered over an extended period of 30 hours. See column 2, lines 62-64, columns 5-10, column 14, lines 14-24 and column 18, lines 30-55. Although, US 6,245, 357 does not claim the polymeric material of the inner wall, Jao et al. teaches what the wall may be made from. Thus, an obvious-type double patenting of claims 8-10, 16, 22, 34 and 35 exists over US 6,245,357 and Jao.

6. Applicants' cooperation is requested in correcting any errors of which applicants may become aware in the specification.
